SUWAASHA MURUGAPERUMAL

Leeds, United Kingdom | +44 7352 678656 | suwaashaperumal@gmail.com
linkedin.com/in/suwaasham | github.com/SuwaashaM | suwaashaM.github.io

PROFESSIONAL PROFILE

MSc Data Science and Analytics graduate (University of Leeds) with a B.Tech in Information Technology and practical experience in machine learning, statistical analysis, Python, R and SQL. Experienced in data preprocessing, feature engineering, model evaluation and data visualisation, with attention to leakage control, interpretability and validation that reflects real-world use. Has communicated technical findings to technical and non-technical audiences. Seeking graduate roles in data science, machine learning, analytics and AI.

TECHNICAL SKILLS

Programming: Python, R, SQL (MySQL)

Data Analysis: Pandas, NumPy, exploratory data analysis, data cleaning, data preprocessing, feature engineering

Machine Learning: Scikit-learn, regression, classification, Random Forest, SVM, cross-validation, model evaluation

Deep Learning: TensorFlow, Keras, CNN, TCN, LSTM, GRU

Statistics: Hypothesis testing, permutation testing, statistical learning, experimental analysis

Data Visualisation: Matplotlib, ggplot2, Power BI, stakeholder-facing reporting

Cloud: Microsoft Azure – foundational internship experience

Tools: Git, GitHub, Streamlit, OpenCV, LaTeX, Figma

PROFESSIONAL EXPERIENCE

Industry Project Team Member, UX and Product Feasibility Aug 2026 – Sep 2026

EPS MSc Work Experience (start-up client, under NDA), University of Leeds

- Worked in a multidisciplinary team on a digital product for a start-up client, alongside technical and non-technical team members
- Conducted competitor and evidence research and contributed to user-interface decisions and product recommendations
- Translated the research into a feasibility report and a client-facing presentation

Data Science Intern Jul 2024 – Aug 2024

Corizo EdTech (remote), India

- Prepared and explored real datasets in Python, then built and evaluated machine learning models
- Communicated results through structured reports and visualisations

Cloud and IoT Intern Dec 2022 – Jan 2023

Microsoft Azure, India

- Developed an IoT-based system using Microsoft Azure services
- Worked with cloud-connected workflows and real-time data-processing concepts, gaining practical exposure to cloud computing, IoT architecture and data monitoring

Intern Aug 2021 – Sep 2021

Public Relations Unit, Government of Chennai, India

- Assisted with public-sector communication, information coordination and administrative workflows

SELECTED PROJECTS

Machine Learning Decoding of Reach-to-Grasp Kinematics (MSc Dissertation) 2026

- Analysed repeated human-movement data (2,600+ trials from 23 participants) across two experiments to test whether visual-feedback availability can be decoded from kinematics
- Engineered kinematic and time-series features and compared Logistic Regression, Random Forest, SVM and deep sequence models (TCN, 1D-CNN, LSTM, GRU)
- Used participant-independent validation to assess generalisation; Logistic Regression reached approximately 64.2% accuracy, confirmed above chance with permutation testing
- Presented technical findings to supervisors from psychology and mathematics

Customer Lifetime Value Prediction 2024

- Analysed 10,000+ customer transactions and improved predictive performance by approximately 22% through feature engineering and model optimisation
- Turned results into retention and growth recommendations; the work contributed to a peer-reviewed publication

ICO Fundraising Prediction (University of Leeds) 2026

- Built an end-to-end R pipeline predicting Initial Coin Offering outcomes, with training-set-only imputation, explicit data-leakage control and cross-validated model comparison
- **Code:** github.com/SuwaashaM/ico-fundraising-prediction

Halloween Application (Hackathon, Top 10 Finalist)

- Built an interactive Python, Streamlit, OpenCV and NLP application combining computer vision and text processing, reaching approximately 90% model accuracy
- **Code:** github.com/SuwaashaM/hauntify-halloween-app

EDUCATION

University of Leeds, Leeds, United Kingdom Sep 2025 – Sep 2026

MSc Data Science and Analytics

- **Modules:** Data Mining & Text Analytics, Statistical Learning, Machine Learning in Practice, Business Analytics, Statistical Theory & Methods, Programming for Data Science, Case Studies
- **Results:** 81% in Case Studies; 76% in Data Mining & Text Analytics

SRM Valliammai Engineering College, Chennai, India Nov 2020 – Apr 2024

B.Tech Information Technology, CGPA 9.02/10

LEADERSHIP, VOLUNTEERING AND COMMUNITY

Incoming Volunteer, AI Lab UK, Leeds From Oct 2026

- Preparing to support the Leeds AI community and attend the October meetup

Speaker Coordination and Event Operations, TEDx University of Leeds ("Convergence") 2025 – 2026

- Guided speakers between the audience, backstage green room and stage as part of a coordinated event team

Technical Symposium Organiser, SRM Valliammai Engineering College

- Organised a technical symposium for approximately 170 participants

ADDITIONAL INFORMATION

Publication: Unleashing Profit Potential: Customer Lifetime Value for Sustainable Business Growth. International Journal of Research and Analytical Reviews (IJRAR), 2024

Certifications: Python Programming (Kaggle); Microsoft Azure (Microsoft); Machine Learning with Python (Corizo); HTML5 (Infosys Springboard)

Achievements: Top 10 hackathon finalist; presented at the National Conference on Computational Intelligence
